

Vision for Learning

We believe we learn through interaction with others, therefore children are provided with opportunities to work together, to collaborate and connect with the wider community. Children learn best when they feel safe, have agency in their learning, to have opportunities to reflect and grow in their capabilities. We believe that it is vital for student growth that we regularly seek and interpret data to inform our teaching.

Student Priorities

- For every child to be in right relationships with self, others and God's creation within a nurturing school community.

- For every child to develop the skills and dispositions to become highly effective, independent learners.
- For every child to deeply engage in their learning path.

- For every child to know they are deeply valued for who they are.
- For every child to have a strong sense of belonging in our school community.
- For every child to reflect and grow in their capabilities as thriving learners and leaders.

- For every child to appreciate and use their agency as they make a difference in the world.
- For every child to ignite their curiosity and use their imagination to influence positive change.
- For every child to see themselves as an innovative, inquisitive, creative and critical thinker.
